Free Express Edition

The Free Express Edition allows you to experience the benefits of LMX right through your development process and release code to customers. For simple uses of XML and C++ this edition may be all you require.

The features of the Express Edition are:

- Unlimited number of attribute and/or element definitions in your schemas².
- Supporting Software¹ in binary form.
- No 64-bit binaries.
- No formal support from Codalogic (Express users community based support mailing list available).
- Only limited configuration of code generator is allowed.
- Royalty-Free distribution of compiled code generated by LMX.
- It's Free!

While this edition only allows limited configuration of LMX, the specification of schemas to compile is unrestricted allowing you to compile any set of schemas that you could compile with the other editions.
