erwin® by Quest® Portfolio

At a glance

The erwin by Quest portfolio combines data modeling and data intelligence software, including data catalog, data quality, data literacy and data marketplace capabilities, to help organizations maximize the value of data. With erwin, you can discover, understand, govern, score and share high-value, trusted data assets all within one platform to advance critical data initiatives such as data and AI governance, data platform modernization, data products delivery, regulatory compliance and more. erwin provides the foundation for leading companies worldwide to expand data visibility, raise data literacy, protect against data and AI risk, and turn valuable data into business opportunity.

erwin Data Modeler

For 30+ years, erwin Data Modeler by Quest has served as the golden standard in data modeling tools. Whether setting the foundation for data governance and compliance or providing integration capabilities across multiple data sources (including SQL and NoSQL support) for smooth, efficient migration and modernization, it provides the improved data visibility and understanding needed to accelerate strategic business decisions. Discover any data from anywhere with consistency, clarity and confidence.

erwin Data Intelligence

erwin Data Intelligence by Quest unites the capabilities of erwin Data Catalog, erwin Data Connectors, erwin Data Quality, erwin Data Literacy and erwin Data Marketplace to make high-value, trusted data assets and AI models easier to find, understand, share and use across your organization while ensuring the data readiness and governance required in an AI-driven era.

erwin Data Catalog

erwin Data Catalog by Quest automates metadata harvesting, curation and mapping to provide a single-source view of metadata across your data landscape. Detailed data lineage, impact analysis, reference data management and lifecycle management provide unparalleled data visibility and management capabilities.
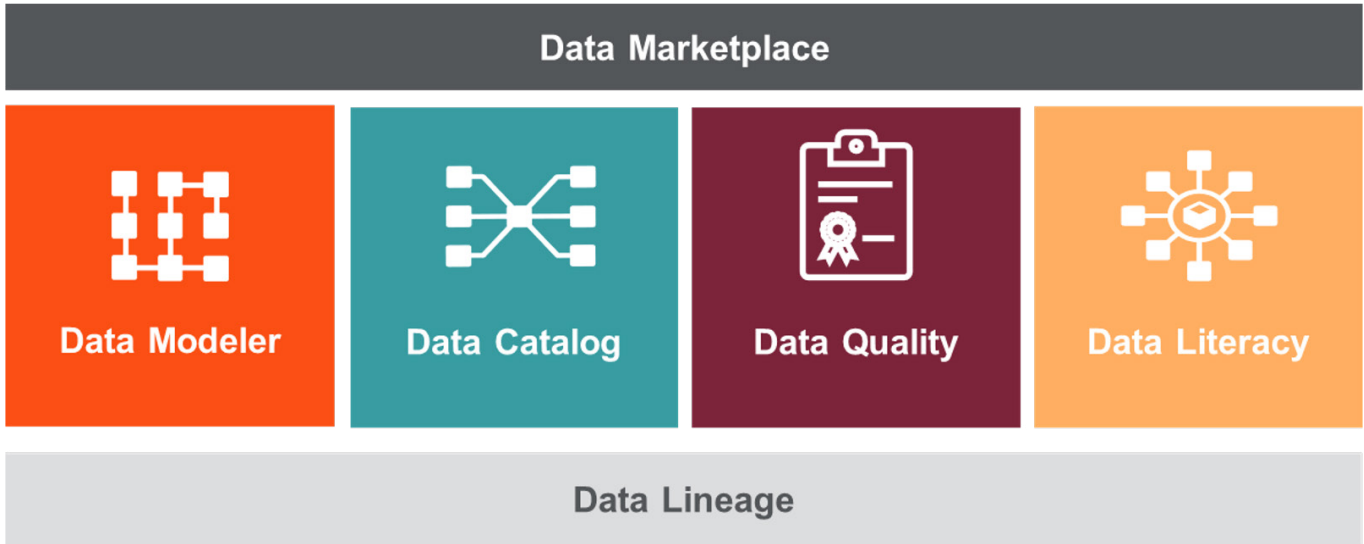

erwin Data Connectors

erwin Data Connectors by Quest are available for a wide range of industry data sources and automatically gather metadata spread throughout your enterprise and populate it into erwin Data Catalog by Quest. erwin Standard Data Connectors are included with erwin Data Catalog at no cost to automate metadata harvesting and ingestion from common data-at-rest data sources. A broad array of optional erwin Smart Data Connectors are available to take active metadata use to the next level. Tackle metadata harvesting from complex data-at-rest data sources, harvest metadata associated with data-in-motion, and automate data pipelines.

erwin Data Quality

erwin Data Quality by Quest automates data profiling and quality scoring, delivers cross-platform data observability and fuels integrated data quality visibility throughout erwin Data Intelligence to ensure data reliability and build organizational data trust. Leverage erwin Data Catalog metadata for profiling and quality assessment and see resulting quality scores in data lineage, impact analysis, mind maps and inside automated data value scoring

Data Marketplace			
Data Modeler	Data Catalog	Data Quality	Data Literacy

Data Lineage

for data marketplace consumers. Continuously monitor key data sources, including critical data supporting AI use, and be alerted as data quality drifts beyond acceptable thresholds to take action.

erwin Data Literacy

erwin Data Literacy by Quest provides data stewards and owners with the business glossary and stewardship capabilities to collaboratively define enterprise data in business terms, incorporate policies and manage data and AI governance accountability and workflow. A business-friendly asset discovery and collaboration experience ensures all organizational users can easily find, assess, understand and use appropriately high-value data assets within your enterprise.

erwin Data Marketplace

erwin Data Marketplace by Quest provides one central location for data users to shop for, analyze, collaborate on and gain access to needed, trusted data. Discover, compare and identify best-fitting data products, datasets and AI models within a consumer-like shopping experience fueled with data intelligence. Leverage automated data value scoring, share data knowledge with ratings and reviews and speed governed access to data for users to maximize business impact.

About Quest

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Microsoft 365 migration and management, and cybersecurity resilience, Quest helps customers solve their next IT challenge now. Quest Software. Where next meets now.
