

Quest® Toad® Data Point

The right data analysis tool to access, integrate and prepare data.

The usefulness of your organization's data lies in your ability to access, integrate, prepare and provision it. But, those tasks are becoming increasingly complex. The variety of data sources and the amount of data with which you must work are growing every day. You need a single, easy-to-use tool that enables you to access all your data sources, from relational databases and non-database sources to non-SQL systems and the cloud.

Quest® Toad® Data Point is a cross-platform, self-service, data integration tool that simplifies data access, preparation and provisioning. It provides nearly limitless data connectivity, desktop data integration, visual query building and workflow automation.

Toad Data Point enables you to quickly and easily access, integrate, prepare and provision data. It includes the ER diagrammer, visual query builder, SQL editing, charts and graphs, Excel reporting, compare and sync, along with automation and scheduling. It includes local storage as well as the ability to integrate disparate data sources, build transformation and cleansing routines, and improve analysis with data visualizations.

With Toad Data Point, you can easily access and work with relational database management systems (RDMS) data sources like Snowflake; traditional RDMS data sources like Oracle, Microsoft, SAP and IBM DB2; data stored in non-traditional sources such as Salesforce.com, SAP BusinessObjects and Oracle Business Intelligence Enterprise Edition (OBIEE); as well as NoSQL sources like Apache Hadoop, Apache

Cassandra, MongoDB, Amazon SimpleDB and Amazon DynamoDB. With Toad Data Point you can also access cloud data warehouses like Snowflake and Amazon Redshift.

Toad Data Point Workbook provides business users with the same capabilities and power of Toad Data Point, but in an easy-to-use graphical interface and simplified workflows that provide independence so you're not reliant on others to provide your data sets and reports.

Benefits:

- **Connect to and run queries against nearly any data source**
- **Develop advanced single-platform and cross-platform SQL queries through an easy-to-use drag-and drop interface**
- **Automate and schedule routine tasks to increase your productivity**
- **Transform and cleanse your result sets (add calculations, columns and groupings, find duplicates and more)**
- **Access advanced mathematical and statistical functions through SQL**
- **Workbook provides an easy-to-use graphical interface and simplified workflows for business users**
- **Integrates with Toad Intelligence Central to simplify, speed and secure the provisioning of data across the organization**

“I need to write queries against all our different database platforms. Toad Data Point saves me time because I’m not hopping around to different tools. I just open Toad Data Point in the morning and I don’t have to ever leave it.”

James McGregor
BI Administrator Zions Bancorporation

With Toad Data Point Workbook, you don’t have to be a SQL expert to build comprehensive queries to extract data from multiple data sources.

This equips you with true self-service data preparation for more accurate visualizations and advanced analytics.

Once you have your data sets prepared using Toad Data Point or Toad Data Point Workbook, you may want to share or provision them to others in your business.

The perfect complement to Toad Data Point is Toad Intelligence Central which enables you to simplify, speed and secure the provisioning of data to different parts of your business so it doesn’t go stale.

Business users and data consumers simply connect to Toad Intelligence Central to get pre-prepared data sets for reporting and advanced analytics.

Features

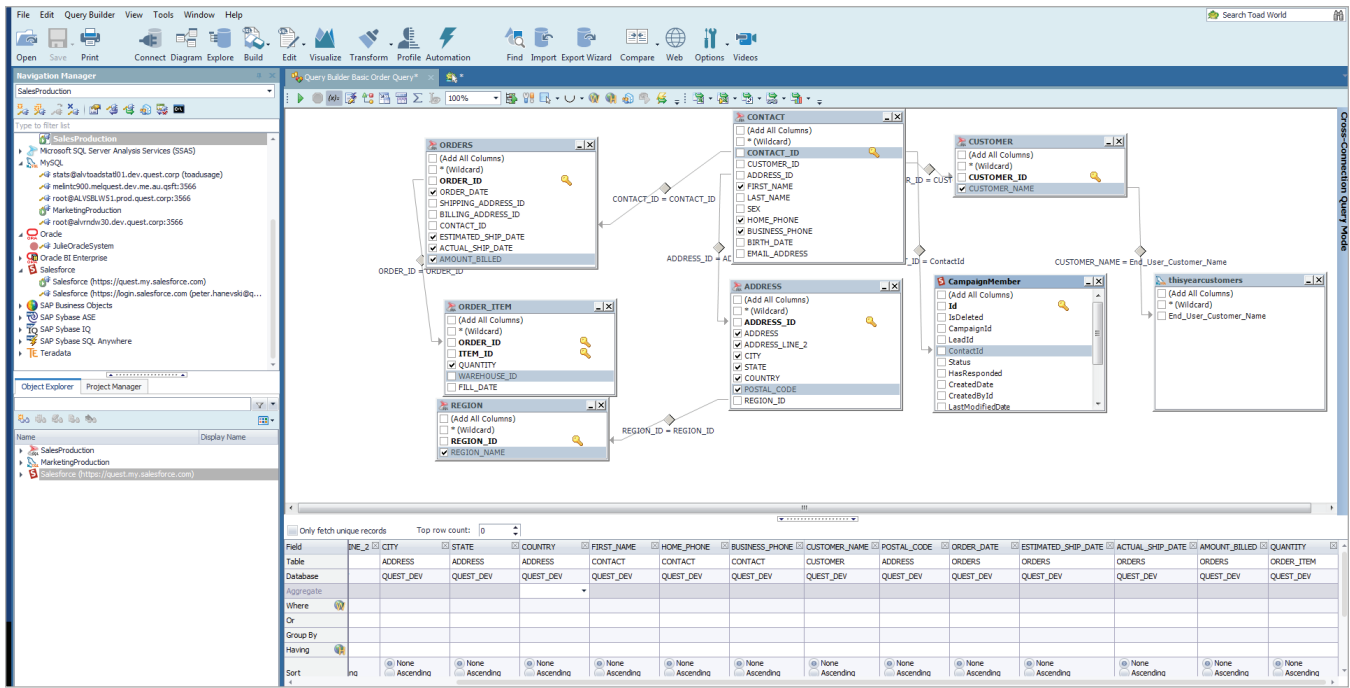

Automation engine — Automate and schedule routine tasks to increase your productivity; develop sophisticated workflows to support advanced projects.

Compare and sync — Compare and synchronize data between different data sources to ensure consistency and validity.

Charts and reports — Design professional charts and graphs to share your data results.

Import/export utility wizard — Load and unload data efficiently. Easily export and publish data to Excel, .CSV, .TXT, HTML, PDF and a variety of other file formats.

SYSTEM REQUIREMENTS

For system requirements and a detailed description of how Toad Data Point supports each platform, visit <https://support.quest.com/toad-data-point/>

Data integration — Simplify data integration through cross-platform SQL queries.

Local data store — Capitalize on the embedded database to become more flexible and agile with your data sets.

Data cleansing area — Transform and cleanse your result sets (add calculations, columns and groupings, find duplicates and more) with a straightforward interface.

Data visualization — Navigate interactive data visualizations to better understand your result sets.

Data profiling — Visually profile and sample database tables and data sets for patterns, unique values, duplicates, missing information, min./max. values and more.

Advanced analytics library — Access advanced mathematical, statistical functions and text algorithms through SQL.

About Quest

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Office 365 management, and cyber security resilience, Quest helps customers solve their next IT challenge now. Quest Software. Where next meets now.
